## Support to the Hungarian Medical Chamber

Prime Minister Orbán,  
Minister Pintér,

The Standing Committee of European Doctors (CPME) represents national medical associations across Europe. Our member the Hungarian Medical Chamber, the Magyar Orvosi Kamara, has informed us about a concerning development at national level.

We understand that a government representative for health has publicly raised doubts as to the rationale for and legitimacy of the Hungarian Medical Chamber as an independent representation of doctors. No justification for this statement was offered.

National medical associations play a crucial role as the independent and democratic representation of the national medical profession and the expression of professional autonomy.

CPME calls on the government to recognise their value for the organisation and delivery of high quality healthcare as well as broader societal benefits, to support their activities and to consult them throughout the policy process.

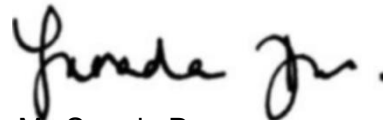

European doctors support their Hungarian colleagues in their action to strengthen their chamber and to find a sustainable structure to continue their work to enable the delivery of the highest quality of healthcare to every patient.

We trust in a speedy resolution and will continue to liaise with our Hungarian colleagues.

Yours sincerely,

Dr Ole Johan Bakke  
CPME President

Ms Sarada Das  
CPME Secretary General
