

The Standing Committee of European Doctors (CPME) represents national medical associations across Europe. We are committed to contributing the medical profession's point of view to EU and European policy-making through pro-active cooperation on a wide range of health and healthcare related issues.

CPME Response to the European Commission Public Consultation on the Revision of the EU Rules on Tobacco Products and Tobacco Advertising

The Standing Committee of European Doctors (CPME) strongly supports the European Commission's objective to update the EU tobacco control legislation, namely Directive 2014/40/EU, commonly referred to as the Tobacco Products Directive (TPD) and Directive 2003/33/EC, commonly referred to as the Tobacco Advertising Directive (TAD), as outlined in the EU Cardiovascular Health Plan. The Commission's goal to achieve a "Tobacco-Free Generation" by 2040 can still be reached but not without urgent and ambitious measures.

CPME believes that measures and policies aimed at protecting people from the effects of tobacco and nicotine consumption as well as from second-hand tobacco smoke and aerosols are beneficial for society. It is urgent to act as tobacco still kills 1.1 million people in the WHO European Region each year and nearly 700,000 in the European Union.^{1 2}

The 2026 evaluation of the TPD and the TAD indicated that the EU tobacco control legislation has not kept pace with recent market developments, consumption trends and digital marketing practices. Certain provisions of the legislation have been outpaced by the emergence and widespread popularity of novel products, especially among young people, such as electronic cigarettes, heated tobacco products and nicotine pouches, and the rapid evolution of digital marketing for tobacco and nicotine products. The revised legislation should regulate all tobacco and non-medical nicotine products regardless of product type or nicotine source, while also being capable of addressing future emerging products and marketing strategies. The EU must ensure effective enforcement of existing and future regulations.

¹ [Effects of tobacco on health](#). WHO/Europe, 2025.

² [European Commission modernises Tobacco Taxation Directive](#). European Commission, 2025.

1. Tobacco Products Directive

The TPD needs a revision to tackle particularly the explosive rise of new, alternative nicotine products which are fuelling a surge in nicotine addiction, particularly among young people. These products are often marketed as “less harmful” or “reduced risk” alternatives to cigarettes. Besides the public health risk new tobacco and nicotine products represent, they also can act as a gateway towards conventional smoking. To protect youth and public health, the EU must take decisive action to prevent uptake of nicotine and tobacco products, and counter nicotine addiction as part of a comprehensive approach to tobacco control. This approach should include mandatory plain and standardised packaging, larger health warnings, a comprehensive ban on flavours and flavour accessories across all tobacco and nicotine products, and the removal of remaining exemptions. As part of a comprehensive strategy to reduce the accessibility and appeal of tobacco and nicotine products, the EU should encourage its member states to adopt and monitor measures such as stricter age limits and financial penalties to retailers selling to underage customers, as well as further restrictions on retail sales, e.g. a ban of vending machines or a display ban of products at points of sale. Where its competence allows, the EU should adopt such measures itself.

2. Tobacco Advertising Directive

The TAD requires revision to address the rise of digital marketing, the explosion of unregulated novel nicotine products, and to eliminate promotional loopholes in retail and entertainment. CPME underlines that new tobacco and recreational nicotine products should not be promoted as they remain harmful and addictive.³ Medically licensed products used exclusively for medical purposes as smoking cessation aids must be marketed as medically licensed products only. The revision of the TAD must close the loopholes that allow tobacco and nicotine products to be promoted through digital platforms, influencers, cross-border online sales, sponsorship, brand stretching and indirect advertising. The TAD must be updated to cover all products and all forms of advertising and promotion, including online and social media environments where children and young people are increasingly exposed to sophisticated marketing strategies.

³ [CPME Policy on Novel Tobacco and Nicotine Products](#). Standing Committee of European Doctors, 2019.

3. Counteracting the tobacco and nicotine industry tactics

The tobacco and nicotine industry designs products, implements marketing campaigns and works to shape policy environments to help them addict particularly youth people.⁴ The industry is exploiting EU laws to prevent the implementation of health measures at the EU level, thus facilitating a prioritisation of commercial interests over public health.⁵ Meetings between tobacco lobbyists and Members of the European Parliament (MEPs) were intensified after the publication of the Commission proposal to update the EU Tobacco Taxation Directive in 2025.⁶ In the process of updating the TPD and the TAD, the European Commission must take into account the experience of past legislative negotiations in particular the revision of the TPD and invest more efforts to adhere strictly to international commitments, like mentioned in the legally binding WHO FCTC Article 5.3, to protect these policies from commercial and other vested interests of the tobacco industry. This must include background checks on the sources providing input, e.g. from purported 'public health experts' or via the public consultation, to identify undeclared links to tobacco industry which also owns many nicotine product manufacturers. These rules must be implemented across all European Commission Directorates-General, other EU institutions, and national governments. European doctors recommend policymakers to maintain strict transparency and disclosure requirements for policymakers about their commercial interests and engagement with lobbyists.⁷

CPME's main financial income is based on members' contributions and it does not receive financial support from industry sources.

Public consultation questionnaire

Revision of the EU rules on tobacco products and tobacco advertising

Fields marked with * are mandatory.

Introduction

Tobacco control refers to a range of measures to protect people from the negative effects of tobacco and nicotine consumption as well as second-hand tobacco smoke and aerosols. The EU tobacco control legislation consists of [Directive 2014/40/EU](#), commonly referred to as the Tobacco Products Directive (hereon referred to as TPD), and [Directive 2003/33/EC](#), commonly referred to as the Tobacco Advertising Directive (hereon referred to as TAD).

The TPD regulates the manufacture, presentation and sale of tobacco products, nicotine-containing electronic cigarettes and herbal products for smoking. The TAD regulates the cross-border advertising of tobacco products in media other than television, as well as the cross-border sponsorship. These Directives aim at ensuring the smooth functioning of the EU single market for tobacco and related products, taking as a base a high level of protection of human health, especially for young people, and meeting the obligations of the Union under the World Health Organisation (WHO) [Framework Convention for Tobacco Control](#) (FCTC).

The [TPD and TAD have been evaluated](#) and following this evaluation, the European Commission is currently working on a proposal for the revision of the TPD and TAD, as outlined in the [Safe Hearts Plan](#). The evaluation of the TPD and TAD demonstrated that the EU tobacco control legislation has contributed, to a certain extent, to the smooth functioning of the EU single market and resulted in a decline of smoking prevalence and tobacco-related deaths. However, it has not kept pace with recent market developments, consumption trends and digital marketing practices. Certain provisions of the legislation have been outpaced by the emergence and widespread popularity of novel products, especially among young people, such as electronic cigarettes, heated tobacco products and nicotine pouches, and the rapid evolution of digital marketing for tobacco and nicotine products.

The objective of this public consultation is to gather feedback to inform the revision of the EU tobacco control legislation.

Definitions for the purpose of this questionnaire:

- **Electronic cigarettes** (e-cigarettes) or similar electronic vaping devices (e.g. e-shisha, e-pipe) are electronic devices that use nicotine or non-nicotine containing e-liquid for the consumption of vapour. E-cigarettes can be disposable (single use) or refillable by means of a refill container and a tank, or rechargeable with single use cartridges. The questions in this public consultation encompass both nicotine and non-nicotine e-cigarettes. Where a question concerns only nicotine-containing e-cigarettes, this is explicitly stated.
- **Heated tobacco products** are tobacco containing sticks heated by devices to produce an emission containing nicotine and other chemicals, which is then inhaled by the user(s).
- **Nicotine products** are nicotine-containing products that do not contain tobacco, such as nicotine-containing electronic cigarettes and nicotine pouches.
- **Non-nicotine products** refer to nicotine-free electronic cigarettes and herbal products.
- **Nicotine pouches** are tobacco-free nicotine products for oral use that come in sachets. Nicotine pouches should not be confused with snus, which is a smokeless tobacco product that also comes in sachets but contains tobacco.
- **Refill containers** are receptacles that contain nicotine-containing liquids, which can be used to refill an electronic cigarette.
- **Tobacco products** are products that consist, even partly, of tobacco. Tobacco products include cigarettes, roll-your-own tobacco, cigars, cigarillos, pipe tobacco, waterpipe tobacco, chewing tobacco, nasal tobacco and heated tobacco products.
- **Young people** refer to persons aged 10 to 24 years.

The Commission will publish all contributions to this public consultation. You can choose whether you would prefer to have your details published or to remain anonymous when your contribution is published. **For the purpose of transparency, the type of respondent (for example, 'business association, 'consumer**

association', 'EU citizen') country of origin, organisation name and size, and its transparency register number, are always published. Your e-mail address will never be published. Opt in to select the privacy option that best suits you. Privacy options default based on the type of respondent selected

* **Contribution publication privacy settings**

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

☐ **Anonymous**

Only organisation details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself if you want to remain anonymous.

☒ **Public**

Organisation details and respondent details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published. Your name will also be published.

☒ I agree with the [personal data protection provisions](#)

* 1. To what extent do you agree with the following statement:

Measures and policies aimed at protecting people from the effects of tobacco and nicotine consumption as well as from second-hand tobacco smoke and aerosols are beneficial for society.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree
- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

* 2. In your view, which products are most attractive to young people?

Between 1 and 3 selections

- ☒ Nicotine e-cigarettes, including e-cigarettes with flavours and disposable e-cigarettes
- ☒ Nicotine-free e-cigarettes, including those with flavours
- ☐ Heated tobacco products
- ☒ Nicotine pouches, including those with flavours
- ☐ Cigarettes / roll-your-own tobacco
- ☐ Waterpipe tobacco, including those with flavours
- ☐ Other (specify)
- ☐ Don't know

* 3. In your view, which products are most attractive to those aged 25 and over?

Between 1 and 3 selections

- ☐ Nicotine e-cigarettes, including e-cigarettes with flavours and disposable e-cigarettes
- ☐ Nicotine-free e-cigarettes, including those with flavours
- ☒ Heated tobacco products
- ☒ Nicotine pouches, including those with flavours
- ☒ Cigarettes / roll-your-own tobacco
- ☐ Waterpipe tobacco, including those with flavours
- ☐ Other (specify)
- ☐ Don't know

* 4. Are you a current user or ex-user of tobacco, nicotine or non-nicotine products?

- ☐ Yes
- ☒ No

6. At what age do you think young people start using tobacco, nicotine or non-nicotine products?

	Under 16 years	16-18 years	19-24 years	Don't know
* Tobacco products	☐	☒	☐	☐
* Nicotine products	☒	☐	☐	☐

* Nicotine-free e-cigarettes and herbal products				
--	---	---	---	---

7. In your view, through which channels do young people most commonly obtain tobacco, nicotine and non-nicotine products?

	Friends	Family members	Retail shops (in-person)	Online retailers from the young people's country	Online retailers other than from the young people's country	Sellers on social media/messaging apps	Informal sellers /black market	Other (specify)	Don't know
* Tobacco products	☒	☒	☒	☐	☐	☐	☐	☐	☐
* Nicotine products	☒	☒	☒	☒	☒	☒	☒	☐	☐
* Nicotine-free e-cigarettes and herbal products	☒	☐	☐	☒	☒	☒	☐	☐	☐

8. The heated tobacco products market (including tobacco heating devices) reached 12.5 billion EUR in 2023, compared to just 4 million EUR in 2013. The EU e-cigarette market grew from 909 million EUR in 2012 to 5 billion EUR in 2023. Nicotine pouches have seen a similar surge, with sales value increasing from 61 million EUR in 2018 to 1 billion EUR in 2023.

To what extent do you agree with the following statement:

Market developments and consumption trends have increased the availability, popularity and use of heated tobacco products, e-cigarettes, and nicotine pouches, particularly among the following groups.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* Among people aged 24 years or less (young people)	☒	☐	☐	☐	☐	☐
* Among people aged between 25 and 34 years	☒	☐	☐	☐	☐	☐
* Among people aged between 35 and 54 years	☒	☐	☐	☐	☐	☐
* Among people aged 55 years or more	☒	☐	☐	☐	☐	☐

- *9. New forms of digital promotion of tobacco and nicotine products have emerged since the adoption of the TAD in 2003. These include promotion on social media platforms, online marketplaces, through influencers, on streaming services, within online video games, in music videos, and in user-generated content without any financial consideration. User-generated content is any content made by individuals without any financial consideration, not by a brand or professional publisher.

To what extent do you agree with the following statement:

The exposure of young people to these new forms of digital promotion of tobacco and nicotine products influences their use and/or uptake of use.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree

- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

10. To what extent do you agree with the following statement:

Further EU action under the EU tobacco control legislation is needed regarding the following promotion practices to reduce the uptake of tobacco, nicotine and non-nicotine products.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* User-generated content from individuals other than influencers	☒	☐	☐	☐	☐	☐
* Brand or corporate promotion including through influencers	☒	☐	☐	☐	☐	☐

- * 11. Across the EU Member States, there are differing national laws covering different aspects of tobacco, nicotine, and non-nicotine products. This means that economic operators must comply with these different rules to place their products on the markets of the various Member States.

To what extent do you agree with the following statement:

Differing national laws create legal complexities and hinder the smooth functioning of the EU single market.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree
- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

12. How important is it to you that the EU tobacco control legislation supports the following objectives with regard to tobacco, nicotine and non-nicotine products?

	Not important	Barely important	Moderately important	Very important	Essential	Don't know
* Preventing the initiation of use	☐	☐	☐	☐	☒	☐
* Supporting the cessation of use	☐	☐	☐	☐	☒	☐
* Ensuring that these products do not have attractive features and do not appeal, particularly to young people	☐	☐	☐	☐	☒	☐
* Ensuring that consumers are well informed about the health risks	☐	☐	☐	☐	☒	☐
* Minimising the administrative burden on Member States	☐	☐	☒	☐	☐	☐
* Minimising the administrative burden on business	☒	☐	☐	☐	☐	☐
* Ensuring that the same conditions for the manufacture, presentation, sale and advertising apply across the EU	☐	☐	☐	☐	☒	☐
* Ensuring that manufacturers and importers can report the necessary information easily and quickly to national and EU authorities	☐	☐	☒	☐	☐	☐

13. To what extent do you agree with the following statements:

The following measures are effective in reducing the uptake and/or harmful effects of consuming nicotine and non-nicotine products.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* Prohibiting flavours	☒	☐	☐	☐	☐	☐
* Prohibiting flavour descriptions and visuals on the packaging	☒	☐	☐	☐	☐	☐
* Reducing nicotine concentration in the product	☒	☐	☐	☐	☐	☐
* Standardising the form and size of tanks, refill containers and cartridges for e-cigarettes	☒	☐	☐	☐	☐	☐
* Setting limits for the nicotine content and/or dose of nicotine pouches	☒	☐	☐	☐	☐	☐
* Strengthening product standards for device safety (e.g. leakage, overheating, battery safety)	☒	☐	☐	☐	☐	☐
* Introducing product design requirements to reduce appeal (e.g. restrictions on device appearance, lighting, "toy-like" features)	☒	☐	☐	☐	☐	☐
* Introducing restrictions on disposable products	☒	☐	☐	☐	☐	☐
* Introducing a ban on disposable e-cigarettes	☒	☐	☐	☐	☐	☐
* Requiring mandatory child-resistant and tamper-evident packaging	☒	☐	☐	☐	☐	☐
* Strengthening restrictions on the ingredients to be used in nicotine and non-nicotine products	☒	☐	☐	☐	☐	☐
* Requiring reporting and testing by manufacturers and importers on product composition and, emissions or aerosol constituents	☒	☐	☐	☐	☐	☐

* Introducing requirements on the traceability	☒	☐	☐	☐	☐	☐
--	----------------------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

- * 14. The scope of the current EU tobacco control legislation covers only tobacco products, nicotine-containing e-cigarettes, and herbal products for smoking. It does not include other nicotine products, herbal products not used for smoking and nicotine-free e-cigarettes, which have been introduced in the market since 2012. As observed in [the evaluation of the TPD](#), nicotine pouches' sales value has increased from 60.8 million EUR in 2018 to 1.09 billion EUR in 2023, whereas traditional tobacco products' sales value has decreased from 153.87 billion in 2012 to 140.75 billion in 2023.

To what extent do you agree with the following statement:

The scope of the EU tobacco control legislation has not kept pace with market developments.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree
- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

15. How important is it to you that the following products – currently not covered by the legislation – would fall within the scope of the EU tobacco control legislation?

	Not important	Barely important	Moderately important	Very important	Essential	Don't know
* Nicotine pouches and other nicotine products without tobacco	☐	☐	☐	☐	☒	☐
* Nicotine-free e-cigarettes, including their devices and tanks, refill containers and cartridges	☐	☐	☐	☐	☒	☐
* Heated herbal products and other new types of herbal products	☐	☐	☐	☐	☒	☐

* Devices, accessories and items used for the consumption of tobacco and nicotine products	☐	☐	☐	☐	☒	☐
* Future products	☐	☐	☐	☐	☒	☐

* 16. To what extent do you agree with the following statement:

EU rules need to include a regulatory mechanism that allows the European Commission to react quickly to market, scientific and technical developments.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree
- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

* 17. Technology-neutral definitions focus on the general characteristics of a product and could help ensure that all products of the same definition are covered by the legislation, regardless of technological developments. This would allow products which are not on the market when the legislation came into force to also be covered if they fall under the specified technical definition.

To what extent do you agree with the following statement:

Technology-neutral definitions for products are important in ensuring the objectives of the tobacco control legislation.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree
- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

18. Plain (or standardised) packaging is defined by the World Health Organisation as “measures to restrict or prohibit the use of logos, colours, brand images or

promotional information on packaging other than brand names and product names displayed in a standard colour and font style”. The TPD allows an EU Member State to introduce further of such standardisation requirements regarding the packaging of tobacco products, including plain packaging.

To what extent do you agree with the following statement:

Mandatory plain packaging requirements under EU tobacco control legislation would strengthen the functioning of the EU internal market and/or the protection of public health.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* Functioning of the EU internal market	☒	☐	☐	☐	☐	☐
* Protection of public health	☒	☐	☐	☐	☐	☐

19. To what extent do you agree with the following statement:

The following labelling and packaging measures are effective in ensuring the objectives of the tobacco control legislation.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* Large health warnings with pictures depicting medical conditions associated with the use of tobacco and nicotine products	☒	☐	☐	☐	☐	☐
* Plain or standardised packaging of the products	☒	☐	☐	☐	☐	☐
* Standardised form and size of tanks, refill containers and cartridges for e-cigarettes	☒	☐	☐	☐	☐	☐
* Prohibition of misleading descriptors on the packaging (e.g. “natural”, “organic”, “nicotine-free”)	☒	☐	☐	☐	☐	☐
* Leaflets/inserts with quitting information	☒	☐	☐	☐	☐	☐

* Prohibition of elements that promote the product or encourage its consumption by creating an erroneous impression about its characteristics, health effects or risks	☒	☐	☐	☐	☐	☐
--	----------------------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

20. E-cigarettes and nicotine pouches can come in variety of flavours (such as fruit, herb, candy or ice cream). The evaluation of the tobacco control framework has shown that flavours seem to play a key factor influencing young people's decision to start using these products. Flavours can create the impression that the product is less harmful and make the product more attractive and easier to use. Some EU Member States have prohibited flavours in e-cigarettes and refill containers while others have not.

To what extent do you agree with the following statement:

A prohibition of flavours in e-cigarettes and nicotine pouches would strengthen the functioning of the EU internal market (by eliminating different approaches across the Member States) and/or the protection of public health.

	Agree	Partly agree	Neither agree nor disagree	Partly disagree	Disagree	Don't know
* Functioning of the EU internal market	☒	☐	☐	☐	☐	☐
* Protection of public health	☒	☐	☐	☐	☐	☐

* 21. The EU tobacco traceability system records the movements of legal tobacco products across the EU. It allows EU Member States to determine whether a product has been diverted into the illicit market. The traceability system currently covers only tobacco products and does not extend to e-cigarettes and other nicotine or non-nicotine products.

To what extent do you agree with the following statement:

The EU tobacco traceability system should also cover products other than tobacco products.

- ☒ Agree
- ☐ Partly agree
- ☐ Neither agree nor disagree

- ☐ Partly disagree
- ☐ Disagree
- ☐ Don't know

22. How important is it that the EU tobacco control legislation be strengthened in the following areas?

	Not important	Barely important	Moderately important	Very important	Essential	Don't know
* Reporting of accurate and complete information on the products by manufacturers and importers for the European Commission and the Member States' enforcement authorities	☐	☐	☐	☐	☒	☐
* Traceability tools to assist Member States in detecting illicit trade practices	☐	☐	☐	☐	☒	☐
* The adaptability of the legislation to respond to new market developments	☐	☐	☐	☐	☒	☐
